

# REGULATIONS OF ARTICLE SUBMISSION

## VIETNAMESE JOURNAL OF RADIOLOGY AND NUCLEAR MEDICINE

The Vietnamese Journal of Radiology and Nuclear Medicine belongs to the Vietnamese Society of Radiology and Nuclear Medicine (VSRNM) is a forum for exchanging scientific information and activities of Radiology and Nuclear Medicine area nationwide. The journal published 4 issues/year including scientific researches, Review, Clinical cases, and the activities of VSRNM ... to facilitate academic and experience exchange between members and other societies. The editorial board are welcome to receive the cooperation and submission from colleagues for the Journal, to: tapchidqyhnhvn@gmail.com

### 1. FOR SCIENTIFIC RESEARCH ARTICLES

1.1. The full text of the submission is written in Vietnamese, A4 paper size, Times New Roman font, font size 12, line spacing 1,2.

The article must not exceed 8 pages (including tables, figures, references...).

1.2. Arrangement of the manuscript:

- Title: Brief, no more than 2 lines, bold font 16.
- Full name of the author, affiliation without title, and academic degree. E-mail of the first author
- Abstracts: Written briefly in Vietnamese including background, objectives, subjects, methods, results, conclusions. The keywords (not more than 6 words at maximum) should be provided. The abstract should be written in italics, no more than 250 words.
- The following sections are numbered in Roman numerals, whose sub-sections are 1 1.1, 1.2, 2,3.

I. BACKGROUNDS: including the research objectives

II. SUBJECTS AND METHODS

III. RESULTS

IV. DISCUSSION (the results and discussion can combine as one section).

V. CONCLUSION

VI. References (without Roman numbering). References are cited by number, not by author's name and year. Each paper should have 10 to 15 references, excluding the overview. Documents are collected and arranged in order of citation and must be cited in the article. References must be kept verbatim, not transcribed, not translated. Limit the use of theses, textbooks, and websites as references

Summary in English, keywords.

### 2. FOR REVIEW

Title: Brief, no more than 20 words demonstrated the main content of articles avoid acronyms

Abstract: Briefly state the overview topic, the purpose of the article, and how to collect and process references, research prospects, and conclusions. The summary is presented in a paragraph of no more than 200 words.

Keywords: show the main problem that the research covers, maximum 6 words.

I. INTRODUCTION

State the general problem and the reasons leading to the overview of the research topic, the meaning of the overview of the research topic, the author's point of view, and approach when reviewing the problem.

## II. CONTENT OVEVIEW

It can be divided into subsections depending on the author's point of view and approach. There should be statements indicating future research trends of the reviewed topic. The author should pay attention to prioritizing documents published in the most recent time compared to the time of writing the review.

## III. CONCLUSION

State what information the review provided, whether the review's objectives were achieved, and present prospects for further research on the topic.

## REFERENCES

Authors who write reviews are paid royalties according to the regulations of the Editorial Board and do not have to pay fees for manuscript review.

## CLINICAL CASE

- Not published in any publications.
- Write in the form of exchanging professional experiences, sharing information, and professional skills.
- Aimed at readers who are medical professionals, doctors, technicians specializing in Radiology and Nuclear Medicine, emphasizing practicality, giving priority to explaining the inadequacies and problems encountered, emphasizing the optimal solution in the process of diagnosis and treatment.
- Articles from 2000 - 3000 words, written concisely, focusing on expertise.

Title: Capital letters, concise, maximum 20 words but represent the main content of the article, avoid acronyms

Abstract: it is necessary to show the detection situation, outline the process of detection, diagnosis, treatment, and treatment results of the disease case. The abstract is presented in one paragraph and should not exceed 200 words.

Keywords: show the main problem that the research covers, maximum 6 words.

## I. INTRODUCTION

Introduction for readers to understand the case, know the benefits of reading the case information.

## II. CASE PRESENTATION

Describe the circumstances of case discovery, plan, management and treatment procedures, and treatment results.

## III. DISCUSSION

Explain the circumstances of the case and the results obtained.

## IV. CONCLUSION

It is necessary to clearly state the main conclusions drawn from the case, clearly explain the importance and extent of influence, contribution to medicine, and the premise for future medical research/advancement.
